

TimberSoy[™] Natural Wood Stain

Penetrating Non Toxic Wood Stain

- ✓ 100% natural plant oil emulsion to replenish natural oils that rejuvenates, preserves and protects wood substrates.
- ✓ Penetrating non film forming chemistry to integrally bond and colorize natural wood surfaces so it will never flake or peel.
- ✓ No VOC's, no toxic offgassing, no crystalline silica, and no solvent odor.
- ✓ Fast dry times usually within 1 hour. Allows your project to go quickly for a fast return to service.
- ✓ 35 standard wood stain colors with Infrared reflective (I.R.) non fading wood color options.
- ✓ A breathable wood stain that allows moisture to escape and breath.

INTENDED USES:

- Wood Decks
- Wood Floors
- Wood Sheds
- Wood Siding
- Wood Cabins
- Wood Furniture
- Wood Fences

GREEN BUILDING ATTRIBUTES:

- Low Emitting Material
- Renewable Resource
- Recycled Content
- Innovation in Design
- Regional Materials
- Material Reuse

PROFESSIONAL ATTRIBUTES:

- Virtually Unlimited Colors
- Non Fading Color Options
- 30-60 Minute Dry Time
- Highest Coverage Rates
- Breathable Chemistry
- Will Not Flake or Peel
- Lap Free Flow
- No Toxic Exposures
- No Solvent Odors
- Spray, Wipe or Pad Apply
- Fast Water Cleanup

SHEEN:

Natural Integral Non Film Finish. Select from a range of natural, matte, or gloss topcoats for added protection and desired sheen levels.

Made in the USA

Description

TimberSoy Natural Wood Stain is a bio-based non toxic wood stain formulated with our proprietary natural plant oil emulsion chemistry that replicates petrochemical performance without toxins, solvent odors, or flammability concerns.

It was developed to solve common issues of premature wood rot, early stain delamination, paint films that hide the natural beauty of the wood grain, and early color fade. TimberSoy uniquely balances the advantages of an oil based stain but in a water based system. It is able to deeply absorb into the wood fibers to replenish the natural oils that help rejuvenate, preserve, and protect it from premature drying or decay. In addition, our penetrating wood stain technology will integrally bond and colorize wood surfaces to highlight its natural beauty, and since it is non film forming, it will never flake or peel.

If you live in a harsh UV environment and are tired of fading wood stain colors, we provide a non fading solar reflective pigment option. Color selection is never a limitation. You can choose from 35 standard semi-transparent colors, I.R. (infrared reflective/solar reflective) non fading colors, premeasured pigments packs to darken your color or request a custom color.

Save time, materials, and costs without jeopardizing your health or environmental welfare. Select the best wood stain for your wood finish project.

Technical Data

Typical Coverage: 400 - 600 Sq.Ft./Gallon
 Typical Dry Time: 30 Min. to 1 Hour
 Installation Temperature: 45°F - 100°F
 Regulatory V.O.C.: 0 g/L
 Bio-Based Content: <40%
 Recycled Content: <40%
 Flash Point: Non Flammable
 Clean Up: Soap & Water

Application Equipment Choices

Airless Sprayer: Tip Size .010 - .012.
 HVLP Sprayer: Standard Mist Spray
 90 PSI Pump Sprayer-Best (Pad or buff in)
 Brush: High Quality Nylon or Polyester.
 Nylon Foam Block Applicator
 Stain Pad
 Floor Buffer/Orbital Buffer w/White Pad

Wood Stain Colors:

35 Standard Colors and I.R. Non Fading Colors. Unlimited Custom Colors Available.

Non Toxic Ingredients:

Water, 100% Bio-Based Emulsion Mixture, Proprietary Solvent Free Emulsion Resin, Natural Preservative, Solvent Free Surfactants, Solvent Free Thickeners.

No Red List Chemicals
